For readers of such crusading works of nonfiction as Katherine Boo's *Beyond the Beautiful Forever* and Tracy Kidder's *Mountains Beyond Mountains* comes a powerful and captivating examination of two entwined global crises: environmental destruction and human trafficking—and an inspiring, bold plan for how we can solve them.

A leading expert on modern-day slavery, Kevin Bales has traveled to some of the world's most dangerous places documenting and battling human trafficking. In the course of his reporting, Bales began to notice a pattern emerging: Where slavery existed, so did massive, unchecked environmental destruction. But why?

Bales set off to find the answer in a fascinating and moving journey that took him into the lives of modern-day slaves and along a supply chain that leads directly to the cellphones in our pockets. What he discovered is that even as it destroys individuals, families, and communities, new forms of slavery that proliferate in the world's lawless zones also pose a grave threat to the environment. Simply put, modern-day slavery is destroying the planet.

The product of seven years of travel and research, *Blood and Earth* brings us dramatic stories from the world's most beautiful and tragic places, the environmental and human-rights hotspots where this crisis is concentrated. But it also tells the stories of some of the most common products we all consume—from computers to shrimp to jewelry—whose origins are found in these same places.

*Blood and Earth* calls on us to recognize the grievous harm we have done to one another, put an end to it, and recommit to repairing the world. This is a clear-eyed and inspiring book that suggests how we can begin the work of healing humanity and the planet we share.

A Thought Provoking Connection Between Modern Slavery and Environmental Destruction

By M. Datta

I've been incorporating the work of Dr. Kevin Bales into my human rights courses for the past several years. His first book, *Disposable People*, helped establish the conversation that slavery is not just a thing of the

past, but rather a present day threat to global human security. In this new book, *Blood and Earth*, Dr. Bales identifies an important linkage between the environmental and human rights movements. Dr. Bales' thesis is that contemporary slavery is not just an egregious human rights problem, but also a significant environmental concern. Modern slaves are forced to contribute to the deforestation of the Amazon, the mining of the earth in Africa, and (among other injustices), the pollution of the air via brick kilns in India. Dr. Bales presents a moving and convincing argument that we can dramatically reduce CO2 emissions by working to end modern slavery. A great read and inspiring work.

Five Stars for this World Wake-up Call

By Janet Anna

Kevin Bales has peeled off the layers and exposed the links between two major world problems -- environmental destruction and human trafficking. What he found in his travels and research surprised, saddened and sometimes shocked me. This book is a must read for its courage and honesty and its call to action for every consumer.

a wake up call to all of us

By Ilana S. Hairston

Kevin Bales is a modern day abolitionist and has written several books on modern slavery. What I found compelling was the co-dependency he demonstrates between slavery and environmental destruction. His sobering depiction of communities devastated by climate change and other sources of environmental ruin, further victimized by corrupt systems of debt and judicial malfeasance, forced into bondage for generations. It's well written and heart felt, and a wake up call to all of us.
