However, we constantly suggest that publications Gerontological Nursing (3rd Edition) By Patricia A. Tabloski can be an excellent invasion for your life.

# GERONTOLOGICAL NURSING (3RD EDITION) BY PATRICIA A. TABLOSKI PDF

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses "add life to years," not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.

Contradictions everywhere!

By sean

Absolutely horrible. So many contradictions. Example: in one of the boxes it says that arcus senilis is caused by calcium deposits around the cornea of the eye, then directly below in a paragraph on the same page it says that it is caused by lipid deposits! If that's not a contradiction, then here's another one I found: In the beginning of one of the chapters it says that most abused elder are caucasian females, then a few pages later it says that the most commonly abused elders are minority females. Unbelievable errors all over this book! One section of the book states that short term memory is relatively stable in the elderly, then in another chapter it states that short term memory begins to decline!! Shall I keep going?!? It says that one of the signs of neglect is malnutrition, then when I took the practice questions provided it said that malnutrition is not a sign of neglect. One of the rationales said that thyroid function is not an indicator of elder abuse, then why was that one of the correct answers in a question about what test should the nurse anticipate when suspecting

elder abuse?

Kindle addition

By Jennifer

Love this book in the kindle addition. You can search key words. You also have less bulk laying around the house. It is a well written book that covers the normal changes in aging. You can use it on your kindle app on which ever tablet you use.

Careful peer review needed prior to publishing.

By Veronica C. Freeman

I agree with the other 1-star ratings. Pick a different book. Contradictions everywhere. This book contradicts many nursing fundamental principles. The publisher exam questions the instructor used where based on minor detail recall. Lots of information, lot of tables and charts, lot of contradictions. Rationales completely contradict them selves from the 2nd edition chapter review questions for online resources on basic fundamental teachings. Very disappointed in the textbook.
