Medical Math and so much more.

By Work2Play

Same product here that is sold in my college book store at the same price. This comes in a laminate tri-fold with a 3 hole punch for your binder if needed. Whether you are a student or professional, the information contained on all six sides is pertinent, easy to read and durable. All the math equivalents you'll ever need are here including common abbreviations, (b.i.d., p.c., po, q.i.d, ss etc...) There is also coding measurement for

burns in adults and children, APGAR, Pediatric definitions, clinical indicators, Pressure Ulcer Risk Assessment, lab values, needle length/gauge and on and on... LOVE IT!

27 of 29 people found the following review helpful.

Nursing aides

By K. Kelly

This is a quality product. An asset for any new nurse to have. If it weren't for my RN nurse instructor showing me these, I would have been without an incredible source of information. It is not only math information, but measurements for peds, vital signs, childhood milestones, APGAR scoring and much more. LOVE IT!!!

11 of 11 people found the following review helpful.

great ref

By Jacqueline Foster

I t gave what I was looking for with dosage calculations and so much more than I wanted! I think it covered just about the all nursing math if not all!
